MARKETS FIRMING UP-ALL-AROUND ADVANCE.

GRAIN BULLS HAD THEIR IN-

Wheat Was Especially Strong and Bullish and Made Big Gains-Other Grains Higher.

Office Republic, Wednesday, Get St. 1930. The bulle in grain this mercine bud their terest. In other words, it was a related or day for the longs, who started off seith a lead and were never headed on they having the best of it all the way through a material advance all along the line being scored and the bears out almost completely to rout, for the time being at least. Factors which have operated as a weakening influence the two previous days of the week, were supplanted to-day by those of a builtish nature. There was no question of the strength of the situation, and especially that of wheat, though other grains participated and showed a pretty hold front nearly all day, the result of which was that prices at the close showed an all-round gain, which, in some instances, was particularly noticeable on account of the previous weakness and depression that have heretofore characterized them.

The slight undersons of strength displayed by wheat resterday, and which resulted in a small advance in prices at the close, was continued to slay with more force and vicor and resulted in contrast tricks of this grain very much higher, and closing them right at the tot. In 1901, the

on have been brought mood by a spinning indused by the prospects of a scort crop in Argentine. The feeling here was further strengthened by a direct cubie from that roundry, which said that the guillook was for a short crop, the damage being estimated at 39 per cent, and it was calmed by a Chicago house that they had been onlying on Argentine grooms whose the opening day of the week. Receipts here were buying on Argentine truers winds the ejeming day of the week. Receipts here were ingrity large at \$2.400 bm, which were located bm. less than a week ago, but considerably in excess of those of a year ago. Public stocks at this point were also decreased 45.000 bm. There was no evidence of the predicted increase at spring-wheat points, the arrivals there this morning being 441 care, against 53 a week ago, and 657 a year ago. Reports of fly damage were not as numerous as they have been, though there were a number received during the day.

That the local crowd regarded the news from Argentine as most important and uninistakably builded was evidenced by the way they Jumped in and bought right at the start, paying ke advance for the Dec. option—that is, Tike—and then rushing it up to 72%c. May in the meantime seding at 16½c, 76½c and 76½c. The buying this morning was for both interests, but chiefly for long account. The buying became more than ever urgent on the part of the shorts, who were badly rattled by the further effects of the Argentine damage reports than there had been further advances in that market, and it had closed 1½c to 1½c and May was bid 77½c 35c. The buying there was en casting of of values due to a cable from Argentine to the effect that the weather had improved very much, and also to the fact that the markets on the Continent were not as excited as was Liverpool. Antwerp was reported ½c higher to ½c lower, Berlin off ½c, and May to 77c before the store were said and solow of sale.

St. Louis, Wednesday, Oct. 31, 1999.

The produce increase, on a rule, were extremely quiet to-day, but subjects were duil and the closed extremely quiet to-day, but subjects were duil and weak. Receipts of Nottons were duil and weak. Receipts of Nottons were shadly and the local demand was laying the subject of the local or shipping that were subject to defering. Receipts by river were light, but contained the damaged stock was fifteness were shadly and show of sale. Catholic was higher, Offerings included considerable heared and damaged stock, which could only be soid at a discount. Offerings included considerable heared and damaged stock, which could considerable heared and damaged stock was firm, and choice stock was in good demand. The clearances of four and whistal from this side were light in the contained were steady and in fair demand. The four and whistal from this side were light, and there was a good demand. The choice, sound fruit, and there was a good demand.

RYE—Higher and No. 2 in demand, but scarce, a bid of so E. sale failing to purchase; No. 3 sold this side at Ec.

FLOUR - sellers were stronger in their ideas said advanced price is, though reporting no increase in the document, the navance due to the lighter wheat markets, Expert saides few and of the lighter wheat markets, Expert saides few and of the same character as for some time-rather strengthing and in small lots. Democstic crises were of about the same description. Qualitations on root winter wheat show a few properties of the same state of the same description. Qualitations on root winter wheat show as a follows; Fatents St. Scalles, straights St. Scalles, and St. Scalles, St. Straights, and St. Scalles, St. Straights, and St. Scalles, St. Scalles, and St. Scalles, St. Scalles, and St. Scalles, St. Scalles, and St. Scalles, Scalles, and Scalles, Scalles, and Scalles, Scalles, Scalles, and Scalles, Scalles,
